

5th/6th Grade Classes:

Yearbook Announcement!!

Thank you to all the parents, students, and staff that have sent photos. Because of you, we are able to have a yearbook this year and it is ready to order.

Go to www.yearbookordercenter.com and use the school code 20995 to order your yearbook.

Only on-line orders will be accepted this year. The yearbook this year will be \$40.00 for a hardcover book. The last day to order is Friday July 2, 2021.

Thank You!!

****Attention all 6th Grade Parents****

Please remember it is now time to schedule your 6th grader's TDAP Vaccine. This is the required booster for Pertussis (Whooping Cough) and is a government mandated vaccine to enter 7th Grade. Without a record of this vaccine, your student may not enter 7th grade.

Thank you.

Social Studies with Mr. Bird:

Students have been wrapping up their final unit of the school year learning about the 50 states that make up the United States of America. Last week, we played various review games to prepare us for the upcoming test. They will take their test about the 50 states on Monday, June 21.

Science with Ms. Diaz

Greetings Scientists!

This week: We finished our lab reports and were reminded that our project videos are due TOMORROW by 11:59pm as an attachment on the Google assignment “Ecosystems Video”. We are almost there!

Next week: STEM Activities Galore!

It is my last week at DCS and I would like to tell all parents and guardians that it was an absolute HONOR to teach your student. They have enriched my life. I came to DCS to teach but am leaving having been taught so much more about how to be a better person. Thank you for raising wonderful people!

Math with Mrs.Zuniga

friday’s attendance question does go in the gradebook
Recording of my lessons are posted in google classroom.

Varsity, Scholastic, and Honors: Scholastic and Varsity ended the week creating a scale model of a candy wrapper and many of them turned out amazing. I am so proud of the work they did in just two days! Honors ended the week finishing off the last lesson we could get in about circumference and area of circles.

Math with Mrs. Nijjar

Varsity, Scholastic, and Honors: This has been an exciting week for all my classes. Students spent this week working on a “Make a Math Game” project. The student created amazing math games which were interesting and challenging at the same time. I had fun playing these games with the students, and I am going to save them, because they are so good!!

Language Arts with Mr. Harding

With testing over, we are in the home stretch to summer. We will not finish our Fantasy novel, *The Girl Who Drank the Moon*. It is a very good book, and I would hate to kill the joy of reading something truly good with a deadline. In person students are making dioramas, posters, and a large group project in the hallway. At home students can check Google classroom for details if they wish to participate as well. I cannot require the assignment of students at home.

June will be a month to adjust and prepare for the 2021 - 2022 School year. Teachers and students alike need an adjustment period to “regular” classrooms. I look forward to making learning hands-on and fun again as we give the computers a respite.

Language Arts with Ms. Rodieck

As the year closes we are finishing up as close to normal as possible. Students will be finishing up their final projects, writing a letter to next year's students, and the inevitable Trimester Final. The final will be based on the grammar, sentence structures, and conventions we have been reviewing during the month of June.

As this year ends, it is totally different from last year. It has been a joy to teach in-person this last month and I can't wait for next school year to start. We (students, teachers, and families) have learned many lessons since March 13, 2020 that can be used to improve the future. I look forward to teaching students in the classroom next year.

Technology with Ms. Ferguson

All of the Technology classes just finished and turned in their e-portfolio Google Websites that they have developed and published themselves! Over the next week the students both online and in person will be presenting their websites to their classmates. Next week is week 11 of 14 for their trimester in Technology, the students will be moving on to their next electives soon!

Physical Education:

DCS PE will be back on campus, next week & we can't wait!!! :) We will be continuing our New Units: Coach P. "Spikeball, Coach Levand "Frisbee Golf" & Coach Williams "Ramp Shop," when we get back on January 25th, as well as incorporating "PT Tuesday's!"

Parents/Guardians, please continue to make sure students are checking their "Google PE Classroom" daily for assignments, as well as reading & following the directions thoroughly, for assignments being posted by each individual Coach!

Enjoy your weekend...Wash your hands & Continue to stay safe!!! :)

Music with Mr. Dougherty:

DCS 7/8 Music students are continuing to use Soundtrap, a cloud based music composing program that integrates with Google Classroom. We have learned how to compose various drum grooves. Students are now focusing briefly on music theory fundamentals. Since we will not be having our typical end of trimester concert, students will be working a culminating end of semester project that represents what they have learned this trimester.
